

#66 2 MINS

EFFICIENT DEBRIS REMOVAL

(PM: PG. 7-20)

**When you must relocate numerous objects
a relatively short distance via several people**

Set up a "Bucket brigade" = human chain to pass objects person to person:

- **Establish goals** (destination and process)
- Position to **not interfere with CERT operations**.

Process:

Pass items in a ZIGZAG PATTERN:

Form two lines facing each other, passing items along, alternating between the 2 lines. (Reduces twisting of each person's back, and is efficient)
