Medical GLOVES Safely Use, Remove

(PM: 3-19; IG: 3-42)

- **Use latex-free** whenever possible, avoiding skin irritation. Remove hand jewelry.
- **Change gloves for each survivor.** (or dip in 1 part Chlorox - 10 parts clean water, to reduce contamination)
- Safe removal: **touch no fluids** on gloves while you:
 - ✓ **Hold hands out & downward** to reduce drip on you
 - ✓ **Pinch 1st glove just at its sleeve edge**; pull it off over the hand. Bunch it up completely inside 2nd gloved hand. **Don't squeeze** it, dripping fluid.
 - ✓ **Slip bare fingers under lip of remaining glove**, and work that 2nd glove off, inside out.
 - ✓ **Dispose gloves safely in sealable plastic bag or container labeled: 'Bio-Hazard'.**
- **Wash hands as necessary**
