

## EFFICIENT DEBRIS REMOVAL

PM 7-20

**When you must remove numerous objects that obstruct locating or removing survivors, or to allow for transport:**

Set up a “Bucket brigade” = **human chain** to pass debris person to person:

- **Establish goals** (destination), and process
  - Position to **not interfere with rescue operations**.
- \* **Pass items in a zigzag pattern**: Form two lines facing each other, passing items along alternating between the 2 lines. (Reduces twisting of each person’s back)
